

Dentists Who Care

Protecting the Smiles of our Children

We know you care about the dental health of our children, so join us in the Dentists Who Care movement in the fight against childhood dental disease.

The mission of Dentists Who Care is to spread the message of preventive care to children and develop trusting relationships between children and dentistry.

Dentists Who Care is a grassroots movement of dentists working to stop childhood decay. We partner with civic and educational groups to educate children on the importance of dental health to prevent dental disease and eliminate fear of going to the dentist.
